

1. Create a conceptual Diagram about Computing Platform

HARDWARE PLATFORM

- Physical parts of a computer/device where computing happens (CPU, RAM, Storage, etc.)

Examples:

- Desktop Computer
- Laptop Computer

SOFTWARE PLATFORM

- system software that supports running applications (operating system + tools)

Examples:

- Windows OS
- Linux OS

NETWORK / CLOUD PLATFORM

- Computing platform that uses internet servers to store, process and run applications online

Examples:

- Google Cloud Platform
- Microsoft Azure

MOBILE PLATFORM

- Platform maker
- smartphones/tablets that run mobile apps.

WEB PLATFORM

- Platform where applications run through a web browser using internet.
- devices with sensors and limited computing

IoT EMBEDDED PLATFORM

Android

- iOS

Examples:

- ~~Android~~ Google Chrome

Examples:

- Arduino

- Raspberry Pi
- Raspberry Pi

MOBILE PLATFORM

(Android, iOS)

MOBILE PLATFORM

(Google, Microsoft)

MOBILE PLATFORM

(Arduino, Raspberry Pi)
